

DETAILING PACKAGES

WHAT WE DO

To understand what we do, you must first understand the basic principles of detailing. Every vehicle is different and must be treated and appraised upon its own merit. Many detailers will always try to steer you towards their most in depth and expensive packages. In actual fact, most vehicles and indeed their customers may not necessarily require this. Our aim is to give the best, most honest and most professional advice about yours and your vehicle's requirements. No vehicle will leave our studio until we are absolutely certain we have delivered the results you have requested and expect. We want to surpass these wherever possible.

This guide is designed to help you piece together the package that you want for your vehicle. Many of our services are offered as 'add-ons' to allow you to create your own bespoke package, selecting the vehicle treatments that you want.

If you are at all un-sure as to what your vehicle requires, please do not hesitate to ask us and we will make sure to give you the best possible advice.

BASE PACKAGES

Each vehicle detail must begin with a base/preparation treatment. The next four pages outline our four different packages, you must select one of these as a base. After which you may choose one of our Protection Packages and any additional add-ons you require.

FROM £200
1-2 Days Required

OPTION 1 - NEW CAR DETAIL

“It’s a brand new car, why on earth would it need detailing?!”

A commonly heard phrase within our industry! When a new car is built, through their final stage on the production line, they can commonly pick up sanding marks, paint marring, hazing and holograms. Once off the production lines, cars travel hundreds if not thousands of miles from their place of manufacture to your dealer. Often stored in industrial areas, transported by rail or by sea. This process can see a whole world of paint contamination bonding to the vehicle. When your car arrives at the dealer, it’s then up to them to prepare the vehicle and unfortunately the standard to which this is carried out is significantly below par due to their time and financial constraints.

With our new car detail, we want to truly present to you a vehicle that is ‘as new’, giving it the best possible start in life.

During this process we will:

- *Fully decontaminate the vehicle through several wash stages to include: Citrus pre-wash, snow foam, iron fallout removal, tar deposit removal, surface contaminant removal using a clay bar, glass cleaned, wheels and arches decontaminated and conditioned, convertible hood treatment where applicable.*
- *Fully dry the vehicle using a contactless vehicle blower and plush microfiber towels.*
- *Thoroughly inspect the vehicle following a wipe down with isopropyl alcohol using specialist inspection lighting and paint depth measuring tools.*
- *Polishing: A single stage machine polish using an enhancement compound to lift light imperfections and swirl marks from the paint leaving greatly improved level of gloss in readiness for the application of your chosen Paint Protection.*

FROM £300**

2-3 Days Required

OPTION 2 - ENHANCEMENT DETAIL

Our most common package, and in most cases, all your vehicle will ever need.

The Enhancement Detail will truly transform the look of your vehicle and give it a completely new lease of life. It can shave years off the car's appearance and bring most well-maintained vehicles back to looking brand new, if not better! It's a more in-depth process than the new car detail as often there's more imperfections to correct, but you'd be amazed just how much this can transform your vehicle.

The process consists of:

- *Fully decontaminate the vehicle through several wash stages to include: Citrus pre-wash, snow foam, iron fallout removal, tar deposit removal, surface contaminant removal using a clay bar, glass cleaned, wheels and arches decontaminated and conditioned, convertible hood treatment where applicable.*
- *Fully dry the vehicle using a contactless vehicle blower and plush microfiber towels.*
- *Thoroughly inspect the vehicle following a wipe down with isopropyl alcohol using specialist inspection lighting and paint depth measuring tools.*
- *Polishing Process: In most cases this will require a two-stage machine polish. The first being a cutting compound to remove most light scratches, swirls and imperfections followed by a second stage finishing polish to even out the surface and create a deep, gloss finish ready for the installation of your chosen protection package.*

OPTION 3 - PAINT CORRECTION

Or 'The full shebang!' as I like to call it.

Paint correction is a term used too loosely in detailing circles. You hear many less experienced detailers and valeters offering 'paint correction' services in one day at suspiciously low prices, when in actual fact it is simply not possible. Paint Correction in itself is the art of polishing. As a guide, in order to carry out true paint correction, most vehicles will require in excess of 20 hours polishing. It truly is the pursuit of perfection. It may not be for everyone, and nor is it cheap, but seeing the results of it having been done properly really is something to behold.

As every vehicle is different, it's hard to pin point exactly what comes under this category, as we will only undertake paint correction after a full vehicle inspection. It will however include every stage from our Enhancement Detail, but with a far more extensive polishing process. Typically a 3 stage process.

Please contact us directly to discuss this service and arrange your vehicle appraisal.

OPTION 4 - SPECIALIST DETAIL

This category is designed to accommodate for the various different kinds of vehicle we enhance.

We specialize in the following:

- Matte Paint Finishes
- Motorcycle Detailing
- Commercial Vehicle Detailing

If your vehicle falls under any of these categories, please contact us to discuss your requirements and we'll then be able to appraise the vehicle and explain exactly what packages we're able to offer for you

PAINT PROTECTION

We offer our customers various Paint Protection packages to suit their needs.

We will only use products we have carefully chosen as market leaders, offering the best in terms of performance, durability and value for money.

You can select any of these protection packages alongside any of our detailing packages.

The icing on the cake!

1. Stjarnagloss Hybrid Wax - £65

- A high performance wax sealant. Stjarnagloss' Hybrid Wax buffs to a beautiful shine, while its ability to fill blemishes creates an even and repellent surface keeping your vehicle cleaner for longer and retaining its shine for months.
- 3-6 months durability

STJARNAGLOSS

2. CARBON COLLECTIVE Oracle Ceramic Coating - £120

- Oracle is one of the most advanced coatings Carbon Collective have ever created, with ultra hydrophobic properties and unparalleled gloss enhancement. It is also one of the most diverse coatings on the market. Oracle allows you to spend more time driving & less time cleaning, creating a highly repellent coating on the surface which is extremely low maintenance, no more waxing or re-application is needed.

- 3.5H Hardness
- 18-24 months durability

CARBON COLLECTIVE 

3. CARBON COLLECTIVE Dual Layer Ceramic Coating - £180

- Using the hard properties of **Platinum Paint** as a base, with a second layer of **Oracle** on top, here we create the perfect combination of durability and gloss enhancement. The base, with its 7H hardness acts as a glass like layer on the paint to protect from light scratches and swirls, while Oracle's 3.5H hardness and advanced gloss enhancing, repellent and hydrophobic properties enhance your vehicles appearance. Combining the two drastically increases the coating's durability, meaning your car will keep coming up as new for years to come.
- 3.5H and 7H Hardness
- 24-36 months durability

CARBON COLLECTIVE 

4. CARBON COLLECTIVE Pro Range Ceramic Coating- £300

- The jewel in our crown! These products we believe are among the best in the market for vehicle paint protected. Introduced in November 2019, these highly advanced and innovative coatings offer incredible results.
- **Base Layer - Molecule Ceramic Coating**
- A true 9H ultra-hydrophobic coating. Once applied, the coating becomes the active layer on top of the surface, protecting against scratches, swirls, chemicals, bird droppings UV rays.
- **Top Coat - Nero Ceramic Coating**
- The diamond-infused coating is an ultra-hydrophobic coating which can be used on PPF, vinyl wrapped or painted finishes.
- Nero has a high active content, consisting of diamond particles, this helps to maximise gloss & protection whilst aiding the self-healing process, helping to keep your paint swirl free for longer.
- When used as a topcoat over our 9H Molecule Ceramic Coating, it increasing scratch resistance and durability up to 7 years.
- **5-7 years durability**

CARBON COLLECTIVE 

GLASS PROTECTION - £35

Platinum Glass has been formulated from the same technology as our Platinum Wheels & Platinum Paint coatings. Using strong chemical bonds, the coating becomes the new functional layer on the glass surface.

When applied, wiper blade use is significantly reduced as the superhydrophobic sheeting properties of Platinum Glass start at speeds as low as 30MPH. This increases visibility to create a safer driving experience.

Durability is a *minimum* of 6 months on front & rear screens. However, on side windows the durability is 12-24 months.

CARBON COLLECTIVE 

'Wheels-off' ALLOY WHEEL DECONTAMINATION & CERAMIC PROTECTION PACKAGE - £70-£160

Platinum Wheels sealant is an ultra-durable 9H coating which can be used on painted, powder coated, bare metal aluminium and stainless finishes. Once applied, the coating becomes the active layer on top of the wheels surface, protecting them from dirt, brake dust, contaminants & even scratches with a resistance to heat up to 350 degrees,

Prices vary depending on levels of polishing/prep required, whether we coat just the facias or the entire wheel, calipers etc. Please contact us for a quote.

18-24 Months Durability

CARBON
COLLECTIVE 

INTERIOR DETAILING PACKAGES – FROM £50 TO £250

Our interior detailing packages follow the same formula as our exterior packages, ranging from a deep, antibacterial clean, to full in depth decontamination and ceramic protection.

We use a range of market leading products from brands including Gyeon Quartz, Gtechniq, Carbon Collective and Autoglym to perfect your car's interior.

Whether it's a leather treatment, trim coatings or fabric sealant, every method and product used will be designed to suit your desired results.

For an interior appraisal, please give us a call to discuss your requirements.

Our interior packages can be treated as an add-on to any of our exterior detailing packages.

THANK YOU!!
